# Ontologies in Agricultural Traceability

1. Vernacular, Agriculture, Trade and Scientific
2. Context Sensitive Description
3. Complicated Data Entry

# Which would you choose?

# Operational Modelling

Wheat		
Classical Scientific	Commercial / Regulatory	Agronomy / Farm
<i>Triticum turgidum</i> L. var <i>durum</i>	Canadian Western Amber Durum	Strongfield
<i>Triticum aestivum</i> L.	Hard Red Spring Wheat	Carberry

# Ontologies in Agricultural Traceability

1. Vernacular, Agriculture, Trade and Scientific
2. **Context Sensitive Description**
3. Complicated Data Entry

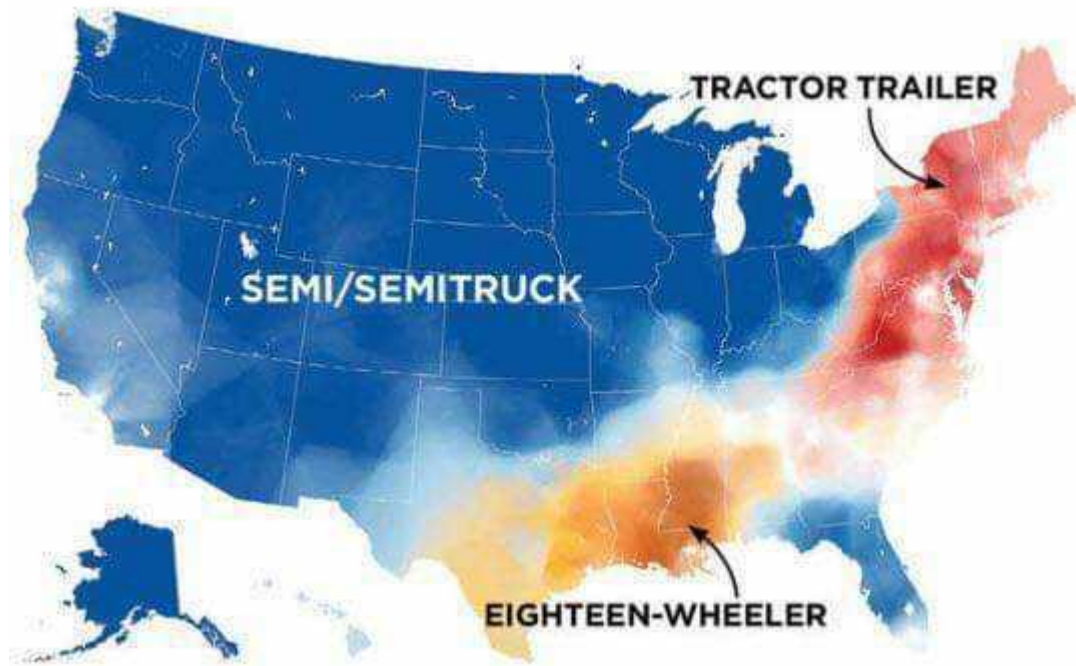

# Corn

# Maize

# Ontologies in Agricultural Traceability

1. Vernacular, Agriculture, Trade and Scientific
2. Context Sensitive Description
3. **Complicated Data Entry**

# I moved my grain with a tractor...

- Data entry is largely ad hoc with the context kept mostly in people's heads.
- Weight of grain stored / moved is often an eyeball estimate.
- Vehicles can have up to two trailers attached, each with up to 4 hoppers (storage compartments), sometimes with different farms piggybacking on the same load. (Hundreds of combinations).
- Entering all that data is time consuming. Most farmers push back since it is immediately obvious to the person on the ground.

Write in "pizza" where it says  
"machine gun"

# Conclusion

- Regulatory paper burden increasing and record keeping practice is mismatched to needs (and not valued).
- Increased crop volumes and trade mean that your first mistake is your last. The horror stories about contaminated supply chains are real.
- This points to increased farming automation in the future and quite possibly forced automation: if people can't do the data entry, the machines must do it for them.

# Operational ontologies...

The best kind of ontology is the kind that you don't know you  
are using!

<https://images.app.goo.gl/wRDeRjtbyns7j3hUA>

# http://rdf.ag/

- We are now shifting to ...beer and beer ingredient traceability.
- New repository for operationally focused agriculture ontologies.
- Heavy use of instances and varieties.
- Emphasis on documentation and citations.
