Previous Discussions

- Review of ABV stakeholders:
 - Producers, Packaging, Taxation, Nutrition
- Review of ABV applications:
 - Wine, Beer, Spirits and non-alcoholic alcoholic food products.
- Viewpoint: Process Measurement, Planned Nominal Value and Packaging / Documentation
- Regulatory (Jurisdiction specific) importance.
- Cultural aspect closely follows.
- Opportunity for cross-application and stakeholder tie-ins.

Snake-oil salesman: wikipedia

Soapbox-top comments by the Chair:

1. Ontologies are precise creatures, the real-world is messy.
2. “We” like erudite, detailed solutions. Most programmers like a “clear, simple and wrong”¹ one-time property.
3. Deployable solutions ~~likely to~~ need typing and subclassing to really solve problems.

1. (I’m channeling H. L. Mencken here)
